

Company Capability Statement

As a long standing, privately owned business in Queensland, Frontline Equipment Maintenance have a reputation for supplying quality skilled tradespeople to any sized business for any sized job. The philosophy underpinning our success is to build and maintain a satisfied customer base through superior quality service and to create long term relationships with customers and most importantly our employees.

Frontline specialise in supplying quality tradespeople including Fitters, Diesel Fitters, Mechanics, Boilermakers and Electricians both Automotive and High Voltage, with experienced in all facets of hydraulic excavators, off-highway trucks, blast hole drills and all other Earthmoving and Ancillary equipment repairs and maintenance. This includes fault diagnose and repair, servicing, midlife overhauls and shutdowns. Our Tradespeople have high levels of experience with all OEM brands of Earthmoving and Ancillary equipment used in both the mining and civil construction industries.

Our maintenance workshop based in Mackay, Queensland, allows us to further expand upon our maintenance services that we have provided over the years. With our qualified, highly skilled and experienced tradespeople who have extensive knowledge in all fields, have the ability to work on a wide range of light to heavy vehicles from family cars, commercial vehicles, 4WDs, trucks, trailers and civil machinery that can assist with any servicing or repairs required.

We currently supply Tradespeople to customers on permanent rostered arrangements, fixed term shutdowns and for short term emergency labour for equipment breakdowns, in either field service or mobile equipment workshop positions.

Frontline are able to supply skilled quality tradespeople for all of your service and repair requirements, including;

- Midlife and Major component change-outs
- Scheduled Servicing and repairs
- Fault diagnosis and repair, of Mechanical, Hydraulic and Electrical Systems
- Labour for annual and sick leave coverage
- Emergency Breakdown Labour
- Equipment relocations, and commissioning
- New Equipment Builds
- Supervisors and Planners
- Steel Fabrication and repairs

Another of Frontline's specialties is to provide customers with a complete service for machine relocations, assemblies and commissioning. We have a dedicated crew, who relocates machines from anywhere cost effectively, working closely with crane and transport suppliers to complete a professional and hassle-free move to any location in Australia.

Frontline can also provide site or town-based Maintenance Planners and Site Supervision staff using our most experienced, trained and qualified senior people, which can be long term additions or for short term leave relief.

Quality Boilermakers are also available who can repair or fabricate any sized job utilising our fully equipped Boilermaker trucks in a field or workshop environment.

With our focus to maintain a skills advantage over our competitors and ensure continuous improvement within our business, we have designed specific training packages and provide in-house training for our employees to make certain Frontline supply quality and skilled tradespeople equipped with the required knowledge and skillset needed by our customers.

Our exemplary safety record is a credit to the quality people we employ and the values by which the company is run. We work hard to maintain our high safety standards and statistics which is no easy feat considering we have in excess of 140 tradesmen on our payroll.

In an effort to reduce costs to our customers and provide a quality service, our people reside in many locations from Far North QLD to the Southern Coast of New South Wales, in a conscious effort to reduce travelling whilst increasing productive time and safety.

We guarantee our people and focus on getting the right person for the job each time. To book a Frontline tradesperson or to enquire about anything maintenance related, a phone call to either Tim, Liam or Aaron on the below numbers is all that is needed.
